LIFE IN COLOUR

Axyl Opera is a range of in-ground square walk over luminaires perfect for urban areas, residential projects and public parks.

Available in square shape, four sizes and four different beam angles, from a soft and diffused effect, to a narrow beam or asymmetrical light distribution.

Axyl Opera L is available with a 5D Beam. Through the integration of a liquid-crystal lens (LensVector™) directly into the optical system advanced flexibility for the lighting designer now comes as standard.

A wide beam angle is also available thanks to Axyl Opera's comfortable double inner reflector and COB LED. Tiltable optics and light engines enhances flexibility and offers the opportunity to fine-tune on site and guarantee the right lit effect for the application.

As well as being available in CRI 90 (2700, 3000 and 4000 K), Axyl Opera L and XL variants are available in RGBW (Medium beam option) meaning a splash of colour can be added to any scheme to draw interest or to offer colour change for events or local celebrations.

The range comes either as Non-Dim, DALI-2 on-board (Large and Extra Large) or for small and medium sized versions, a remote DALI-2 driver is available.

AXYL OPERA

FEATURES

SHAPE AND SIZES

Axyl Opera walk over is a square in-ground luminaire available in four sizes (small to extra large) with a stainless steel or aluminium outer bezel.

LIGHT QUALITY

COB and high power LEDs offer precise light distribution and CRI90.

CONTROLLABILITY

Axyl Opera walk over is available Non-Dim, DALI-2 on-board (large and extra large) and for small and medium a remote DALI-2 driver can be ordered separately.
5D Beam uses liquid-crystal lens technology to electronically shape and adjust the beam with precision.

DURABILITY

Axyl Opera walk over is rated IK09 and IP67. Corrosion Class C3.

HOUSING COLOUR & MATERIAL

Available in White (R9016), Black (R9005), Light Grey (R9006), Anthracite Grey (G9005).

WIRING

Luminaire supplied with neoprene 0.5 m H07RN-F cable and connector, or 0.2 m cable and connector for Axyl Opera L and XL non-RGBW variants.

TECHNICAL DESCRIPTION

Die-cast aluminium housing with high corrosion resistance.
Marine grade stainless steel AISI 316L 2 mm thick front bezel or aluminium.
Toughened glass diffuser 8 mm thick for small and medium, 10 mm thick for large and 12 mm for extra large.
Stainless steel A4 screws.
Silicone gaskets.
Double Power Paint process.
Supplied with polypropylene recessing box.
Electrical Class I.
3 SDCM COB light engine.
Risk class RG1.
Operating Ambient Temperature –20 °C to +50 °C.
Lifetime: 70 000 Hrs L80 B10 Ta 25 °C / 50 000 Hrs L80 B10 Ta 40 °C.
Maximum load capacity 1050 kg for extra large and large sizes.
Maximum load capacity 510 kg for medium and small sizes.

CERTIFICATION

5D BEAM

BEAM ANGLE CHANGE AT THE TOUCH OF A BUTTON

5D Beam brings advanced flexibility to lighting design by integrating a liquid-crystal lens (LensVector™) directly into the optical system.

With 5D Beam, there's no need to physically change lenses or reflectors to create a new lighting effect.

You simply shape and adjust the beam electronically – giving you complete control over both light output and distribution at the touch of a button. Maximum flexibility in just one luminaire.

When activated, an electrical signal aligns the liquid-crystal molecules, allowing light to be shaped precisely to the required angle. A purpose-designed control board delivers the exact voltage needed to manage both the LED and the LensVector™ technology.

5D Beam can be controlled via DALI Signal (DALI Compliant).

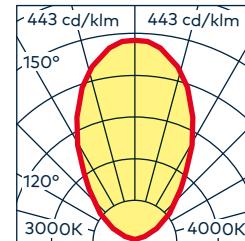

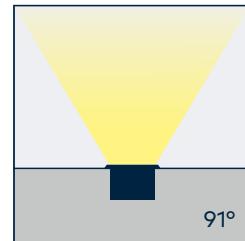

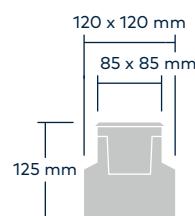

PHOTOMETRIC SUMMARY
